

An approach to identify the sources of low-carbon growth for Europe

Georg Zachmann

2017-02-01

Contents

Preface	5
1 Europe needs a new business model	7
2 Low carbon is promising	9
3 Revealed Strength	11
4 Potential	13
5 Clusters matter	15
Conclusion	17
6 Placeholder	19

Preface

This website serves to illustrate the findings of the policy contribution “An approach to identify the sources of low-carbon growth for Europe” (Zachmann, 2016) and allows a deeper dive into the underlying data. The website is focused on presenting figures and deliberately only offers curt descriptions/interpretations. It is currently structured into five chapters but we plan to extend it when further steps of our analysis become available.

The research underlying this report has been financially supported by the European Climate Foundation’s Industrial Innovation for Competitiveness Initiative (i24c).

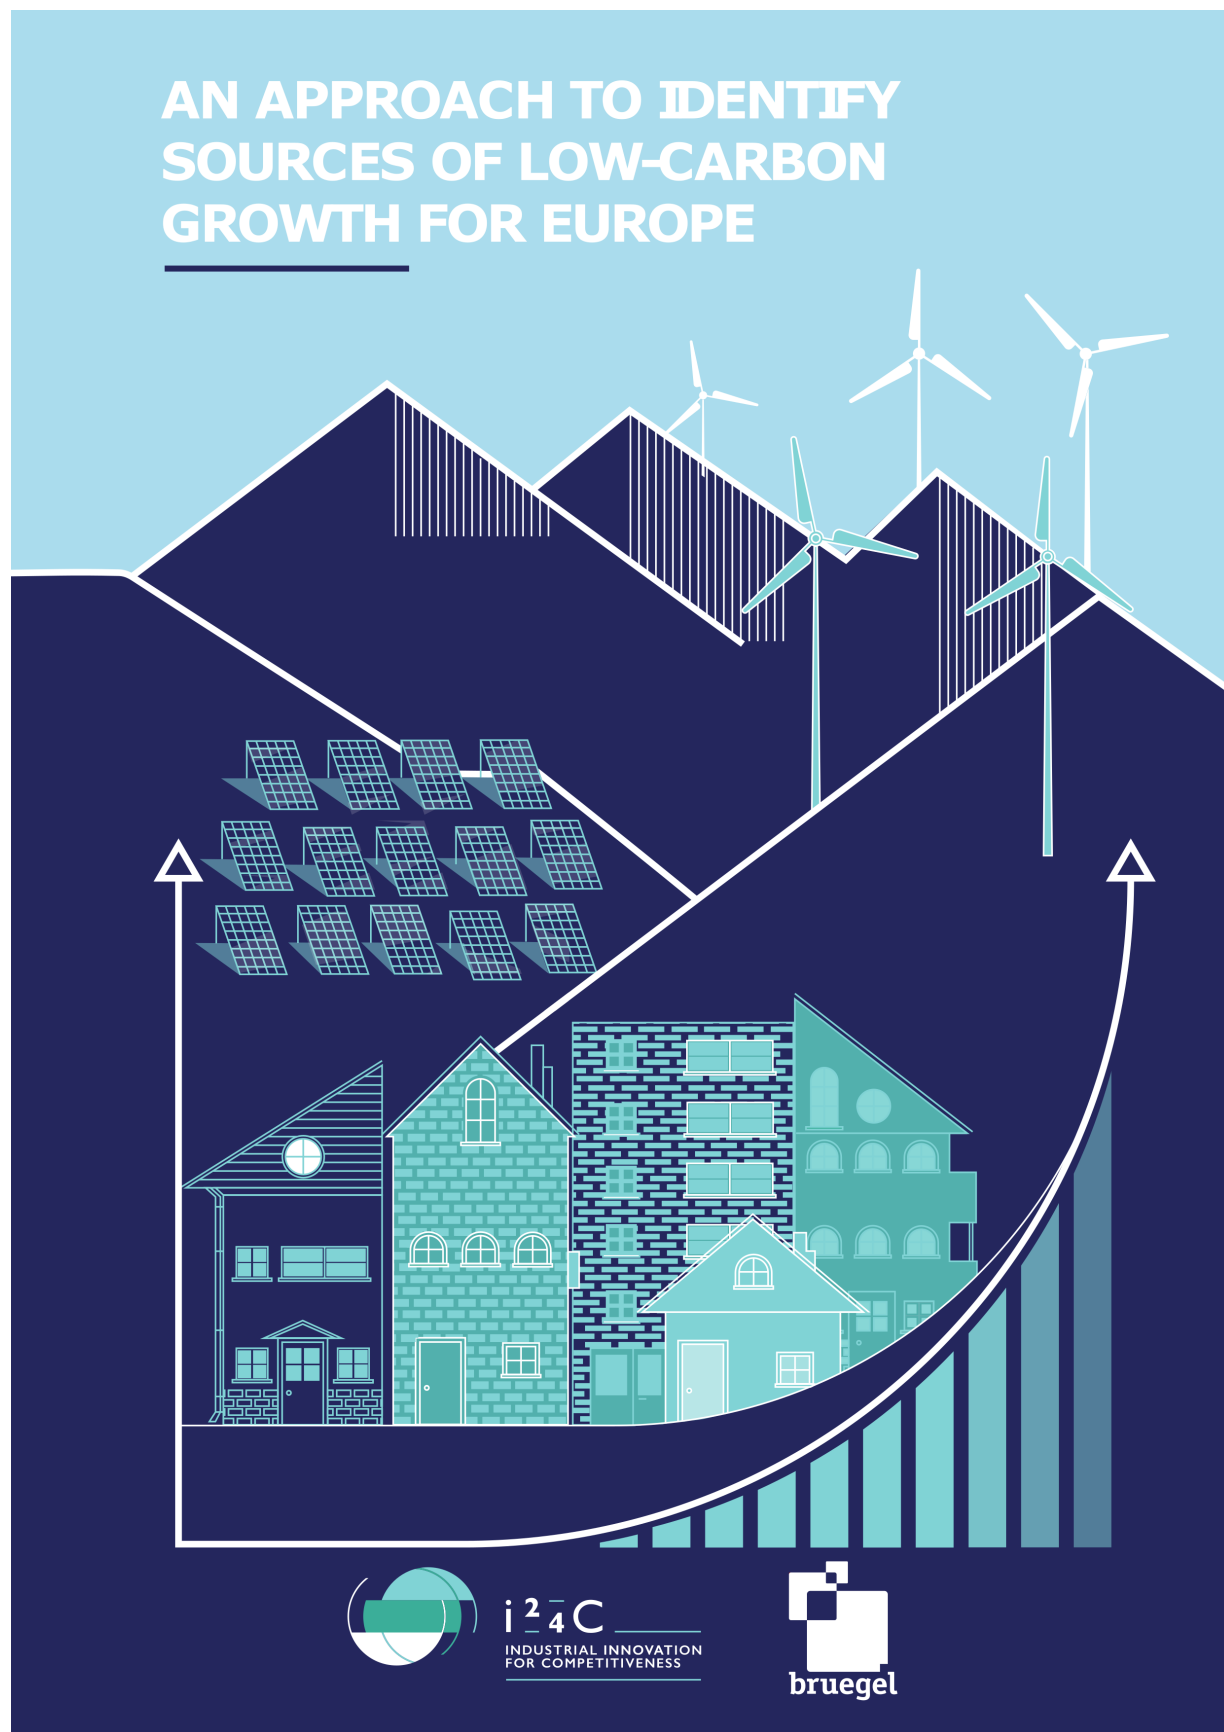

Figure 1:

Chapter 1

Europe needs a new business model

Chapter 2

Low carbon is promising

Chapter 3

Revealed Strength

Chapter 4

Potential

Chapter 5

Clusters matter

Conclusion

Chapter 6
